

THERMAL SYSTEMS

ProMetrics

Profiling and monitoring of the soldering process

June 15, 2022 at 9.00 a.m. and 4.00 p.m.

ProMetrics was developed for monitoring thermal profiles when soldering electronic assemblies. It checks how well the created profile meets the required, predefined specifications.

An envelope graph visualises deviations of the temperature profile from the predefined temperatures. ProMetrics can be used for single and double track systems with and without vacuum.

June 15, 2022 at 9:00 a.m. CEST (for Asia, Europe)

June 15, 2022 at 4:00 p.m. CEST (for Americas, Europe)

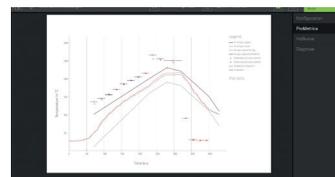

Registration:
i.haug@rehm-group.com

Duration of the webinar: 60 min

Main topics of the webinar

- Optimal profiling and monitoring of the soldering process with ProMetrics
- Integration of the tool into your software environment
- Definition of a process envelope
- Evaluation of assembly related data
- Graphical solutions for your process monitoring

Subject to substantive adjustments.
